

2015 YEAR IN REVIEW

GLOBUS RELIEF: A YEAR OF GROWTH

The year of 2015 was one of great internal growth for Globus Relief. Through specific fine-tuning of in-house processes, Globus Relief not only increased the amount and quality of medical supplies distributed to our charity partners, but also created a system which provides stronger complementary applicable use of medical supplies by recipients, leading to less in-country waste. This internal building was conducted with an eye on aiding Globus Relief to further focus on building medical supply chain and infrastructure in areas of need around the world.

Globus Relief is appreciative of the hard work and dedication of our employees, charity partners, and generous donors who made it possible to provide medical supplies to **70 different countries** in 2015. The resources received and distributed this year were used to fulfill **1,502 requests** for humanitarian aid, including help for those caught in the Nepal earthquake aftermath. They supplied mobile medical

teams throughout rural areas of Morocco and were also used to stock clinics, hospitals, and orphanages throughout the world. Additionally, donations helped provide for our veteran and homeless communities in the United States. Many surgical, medical, dental, and humanitarian missions were conducted by **228 charity partners**. Globus Relief was able to fill **60 containers** of medical supplies and equipment, 26 of which were sent to provide medical care for the millions of refugees living in camps in Turkey and the surrounding countries.

We look forward to a year of continued growth and service with you.

PROGRAMS SERVED IN 2015

- Animal Welfare
- Boy Scout/Eagle Scout Projects
- Burn & Wound Care
- Clinics - Dental, Medical, Vision
- Community Development Programs
- Disability Services
- Disaster Relief, Nepal Earthquake
- Emergency Preparedness
