OUR MISSION

The mission of Globus Relief is to improve the delivery of healthcare worldwide by gathering, processing and distributing surplus medical and health supplies to charities at home and abroad.
A WORD FROM OUR PRESIDENT

Dear Friends,

Sometimes it seems as though we live in a world of increasing turmoil. Floods, hurricanes, earthquakes, terrorism, war and its resulting refugees, and the persistent plague of poverty: all have taken their time on the world’s stage in the course of 2017.

And yet, the spirit of humanity continues to endure: from the thousands who opened their hearts and homes to those who have been displaced, to the multitudes that responded with donations of time, money and support to those who have seemingly lost their all for a moment. Add to that hosts of others who have continued, day in and day out, to quietly go about doing the good to which they have committed.

Globus Relief is proud to have a hand in helping these exemplary humanitarians along their way. In 2017, we sent over $75 million in medical supplies, instruments and equipment to over 40 countries across the world, with $18 million going to refugee care in Turkey and other host countries alone. More than 890 orders went through 166 local, domestic and international partners to aid in their humanitarian missions, from animal welfare and free local dental care to hospital upgrades and international medical missions. In addition, Globus Relief directly donated more than $300,000 in medical supplies to aid in disaster relief in Puerto Rico and other areas. 2017 also saw the induction of the Democratic Republic of the Congo and Kyrgyzstan onto Globus Relief’s long list of countries served. We extend gratitude to our many donors, volunteers and charity partners in 2017 that made these and other successes possible.

In 2018, we look forward to increased growth, both in terms of breadth of reach as we extend our relationship with our existing charity partners and engage new ones, as well as in the depth of our impact as we continue to focus on maximizing the application and use of all donated product. We thank all those who continue to support us, whether through invaluable donations, as a dedicated charity partner or spreading the word about Globus Relief’s work. We are excited about the future – a future in which the spirit of humanity continues to outshine the turmoil of life.

Sincerely,

Ashley Robinson
President & CEO
WHO WE ARE

Founded in 1996, Globus Relief is an internationally-recognized humanitarian medical resource organization providing aid to hundreds of thousands of people around the world. Working with hundreds of qualified local, national and international charities, corporations, healthcare institutions and governments, Globus Relief has distributed over $1 billion (fair market value) of medical equipment, instruments and supplies to people in need in over 150 countries and territories worldwide. Globus Relief’s efficient channeling of surplus, overstocked, gently used, short-dated and other medical goods to partnering charitable organizations helps these organizations reduce overhead costs and focus their time and effort on fulfilling their social missions. In this way, Globus Relief works to improve the financial strength and social effectiveness of numerous charitable organizations every year, while preventing millions of pounds of useable surplus from ending up in landfills and salvage facilities. Enabled by generous donors and volunteers and inspired by a world of need, Globus Relief aims to continue improving the delivery of healthcare worldwide by gathering, processing and distributing surplus medical and health supplies to charities at home and abroad.
THE NEED
Operating rooms and clinics throughout the world tell a shocking story. In one facility in a developing nation, soiled gauze bandages await re-use in the operating room. Gauze sponges like these are manufactured for a single use, but in this hospital they are needed so badly that doctors and nurses wash, dry and re-use them, time after time. Situations like this, and many worse, can be found around the world every single day. Wine bottles are used as catheter drainage bags. Needles, gloves and gauze bandages are washed and re-used. Surgeries are performed using rusty instruments in non-sterile environments. The shortage of supplies is a major hurdle to effective humanitarian intervention; it not only limits the number of people charities can serve, it also forces unsanitary and unsafe practices. It means that dedicated volunteers and relief workers at charities worldwide are unable to help all those who need their attention, simply because they lack the necessary supplies.

THE OPPORTUNITY
While healthcare programs around the world, and even in our own communities, struggle to meet the most basic needs of patients, hundreds of millions of dollars' worth of viable medical supplies are shipped to local landfills every year or sit idle on warehouse shelves. In the course of normal business, any company will confront inventory management challenges. Medical supplies, vitamins and other health-related goods are often discarded for reasons unrelated to their usefulness. Perhaps packaging is damaged, labels are printed inaccurately or branded goods become the casualty of an acquisition or merger. Expensive medical equipment and machines are frequently discarded as U.S. hospitals and care centers upgrade to provide the highest standards of care. This surplus costs American businesses tens of millions of dollars each year in wasted warehouse space, disposal fees and transportation fees. Beyond that, the environmental and human costs of such waste are incalculable.

THE SOLUTION
Globus Relief creates a reliable humanitarian supply chain, redirecting America’s medical and health surplus from overflowing landfills to the people who need it most. We provide an efficient supply source for charities to operate hospitals, clinics, orphanages, refugee camps or disaster relief projects around the world and in our own community. Globus Relief supplies enable charities to reduce overhead costs and serve more people in need. Simultaneously, manufacturers, distributors and hospitals dealing with surplus product can find an inventory solution and meaningful humanitarian impact through Globus Relief. Unique processing capabilities enable us to accept mixed donations that most other charities find difficult to process. We have developed systems that enable us to adhere strictly to donor restrictions and to provide comprehensive reporting on the ultimate use of donated supplies.
2017 YEAR IN REVIEW

BY THE NUMBERS

166 charity partners
  • 99 local & community partners
  • 54 medical mission partners
  • 12 large international partners
  • 1 special project

892 orders shipped
  • 718 domestic projects
  • 174 international projects

The equivalent of 110 shipping containers of medical resources

28 humanitarian project types

42 countries & territories
  • 39 developing countries
  • Representing 1.9 billion people

$49.8 million in donations received

$75.1 million in aid provided

2,991 volunteer hours donated

Total net assets 40,996,518

Total liabilities & net assets $41,557,643

Globus Relief far exceeds the standards set by Charity Navigator, the largest independent charity evaluator in the U.S., in terms of its financial efficiency, financial stability and working capital. Zero long-term debt and an average debt ratio (liabilities to assets) of 2.1% over the past ten years are two examples of Globus Relief’s financial liquidity and stability. And with non-program expenses at less than 1% of total expenses, under Globus’ unique business model, donors can know 99% of donations go directly to humanitarian programs.

*All Charity Navigator references are for Humanitarian Relief Supply organizations. Rating scale retrieved July 2018.
Globus Relief believes in transparency and accountability in all matters of business, including finances. We pride ourselves in maintaining transparency in our financial records and responsibility in our fiscal decisions. Our financial integrity, one of our core values, is one of many reasons we continue to receive Charity Navigator’s highest, 4-star rating year after year.

We take seriously our responsibility to donors, partners and the public to be judicious stewards of the funds and materials made available to us. In 2017, we kept administrative and development costs to 0.7% of total expenses while distributing $75.1 million worth of humanitarian aid. Wise management of our financial resources enables us to help more people, which is the real bottom line.

Your tax-deductible contribution will be used in compliance with Section 170(e)(3) of the Internal Revenue Code (IRC) and supports Globus Relief’s non-profit public charity 501(c)(3) tax-exempt purposes. If you need further information about the eventual humanitarian use of your contribution, please contact us or consider visiting our warehouse for a tour.
Because of Globus Relief’s unique social enterprise business model, 99% of your donations will be used to directly impact humanitarian projects and partners. In addition, because of Globus Relief’s tremendous ability to leverage cash donations to do more good, each dollar donated has the potential of being converted into well over $20 worth of humanitarian impact. Your tax-deductible gift, multiplied in this way, becomes even more far-reaching and life-saving.
CHARITY PARTNERS

Since its founding, Globus Relief has relied on partner charities to distribute its medical supplies, instruments and equipment to underserved populations across the world. Together we have provided medical equipment, instruments and supplies to recipients in over 150 countries and territories and have impacted the lives of hundreds of thousands of individuals worldwide.

International Partners

The majority of Globus Relief’s humanitarian donations are distributed internationally through our partnership with large international relief organizations. We provide high-quality bulk resources in a simple and cost-effective manner, shipping customer-built container-sized orders of aid from our warehouse to disaster relief and ongoing development programs across the world. Our Logistics team also lends support and advice on shipping, customs and logistics.

We also provide unique support to medical mission teams performing cleft lip, cleft palate, orthopedic, dental and other life-changing surgeries in communities around the world. Preparing the needed supplies – from anesthesia to instruments to suture – for medical mission trips is a complicated and costly task often left to volunteers. Globus Relief assists with product procurement, packing and shipping from one central location. This reduces cost and simplifies logistics for these surgical missions, translating into more supplies, more surgeries and more lives changed.

In 2017, Globus Relief provided $72.9 million worth of medical equipment, instruments and supplies to 67 international and medical mission charity partners.

Domestic and Local Partners

While the majority of donations are shipped to humanitarian projects overseas, supporting charities in our own community and in other areas throughout the U.S. remains a crucial part of our mission. By working with domestic and local partners, Globus Relief products serve vulnerable populations including children, the elderly, the disabled, the homeless, the uninsured and even animals. Also, because these charities’ budget dollars go further by sourcing medical resources from Globus Relief, they are able do more good and focus on doing what they do best: helping people in need. We salute these organizations’ tireless efforts to improve quality of life for their neighbors.

In 2017, Globus Relief provided $2.2 million worth of medical equipment, instruments and supplies to 99 domestic and local charity partners.

FROM THE FIELD:

DOING MORE FOR REFUGEES

Refugee Camps, Turkey

March 15, 2017 marked the sixth anniversary of a war that has caused what international policy makers have called the worst humanitarian crisis of the 21st century. 380,000 people killed. More than 11 million – half the country’s pre-war population – displaced from their homes. 13.5 million people in need of aid. Bringing global totals to over 60 million total refugees – a stunning one in nearly 113 people worldwide. Of the 4.8 million Syrian refugees who have fled their country, which now constitute the largest refugee population in the world, Turkey has taken the lion’s share of the load – currently over 2.7 million, approximately half of which are children. And every day more come. Tent cities have bloomed in deserts. Wells have run dry in the face of the thirsty. And humanitarian aid organizations have desperately tried to stem an exponentially growing need.

The world’s response to this need has not been enough. In 2016, the United Nations estimated total required aid to meet emergency level and urgent needs of the most vulnerable Syrians at $4.5 billion; by March of this year, only $2.9 billion had been received. As Antonio Guterres, the UN High Commissioner for Refugees, has said, “The Syria crisis has become the biggest humanitarian emergency of our era, yet the world is failing to meet the needs of refugees and the countries hosting them.”

We can choose to do more.

In 2017, Globus Relief teamed up with Islamic Relief USA and other refugee-focused charities to do its portion of the “more” that is needed. Globus Relief packed 28 forty-foot containers full with 3000 medical mattresses and 240 pallets of medical products. Shipped in January, these containers arrived in Turkey on March 24, 2017 and are being utilized in local hospitals and clinics serving refugees in that refugee-laden area. These items will enable these charities to continue to supply more than 250 hospitals and clinics and perform essential medical treatments, which currently number more than 1.8 million to date.

The need is tremendous. Let us do more.
On September 20, 2017, Hurricane Maria made a direct hit on the American territory of Puerto Rico. Roughly the equivalent of a 50-mile-wide tornado in destruction and force, the hurricane, the fifth-strongest storm to ever hit the US, decimated the island. The storm destroyed 80 percent of power lines, cut off access for millions to communication and left hundreds of thousands in a desperate and ongoing search for food and clean water. Hospitals are overrun with those needing care, and of the hospitals that are open, many are running on limited supplies and unstable generator power.

In October, Globus Relief donated a truckload of medical supplies, valued at $314,675.98, to assist with ongoing relief efforts in Puerto Rico. The project began with a connection between Wilfred Rosas, the mayor of Dunkirk, New York, Hector Rosas, the city’s Special Events Coordinator, and Globus Relief. Working with Jacob Sam, owner of shipping company Agricultural Transport, the team arranged for transport of the 26 pallets of medical supplies to Buffalo, New York, to await transport to Puerto Rico.

With the help of New York State Governor Andrew Cuomo and his team, these supplies will be shipped and disbursed to hospitals in Puerto Rico in collaboration with the Puerto Rican government and the US Army National Guard Armory of Buffalo, New York. Said Mayor Rosas, “As mayor I stand proud of our city of Dunkirk...in their help toward the relief effort for the people of Puerto Rico. I am just happy to be a part of it.”
The last of the planning was still underway as HART volunteers met at the airport at 5:00 am. As the volunteers boarded the plane, months of preparation were about to unfold. The last of the medical supplies, carefully boxed, were shuffled between nurses and physicians at the check-in gate. These materials were just a small sampling of a larger distribution collected through Globus Relief and sent earlier via commercial cargo container.

Arrived in Ghana, the team traveled winding roads to collect the supplies that would literally be life-saving to so many patients that week. The volunteers arrived at the Catholic Center in Goaso, where they were warmly welcomed. Day after day during their week-long “surgery camp,” the team journeyed to operating rooms and clinics where physicians and nurses, armed with better surgical materials than had been seen in these remote villages ever before, evaluated and treated hundreds of patients. Children and adults of all ages came to the clinics for respite from ailments long endured. In some cases, patients who had suffered years from untreated conditions were liberated after just one surgery. The local tribal doctors even referred complicated cases to the HART team; they had faith the team could help them.

As the week ended, the long hours were immediately worth it. To see the gratitude on the faces of the patients and the families who had been suffering alongside them was invaluable. And the local nurses’ and physicians’ request that the volunteers leave behind the extra gauze and suture because they “just don’t have access to quality supplies like this” was humbling. Aptly named, the HART volunteers had spent the week proving that service, however large or small, is primarily a matter of the heart.
The Mexican town of Agua Prieta lies along the US-Mexican border, adjacent to Douglas, Arizona. It had its founding in the railroad industry, transporting minerals from its home state of Sonora across the border to Arizona. While the city has impressive metrics in many areas – a 96% literacy rate, 89% of homes have electricity, etc. – a few others have remained behind the curve. One of these is emergency response. For years, emergency response to auto accidents consisted of first responders arriving by private car onto the scene. Unable to give full medical care from their car, some unnecessarily died. The Red Cross eventually took over responsibility for emergency response but remained unequipped, lacking ambulances and other life-saving tools.

The Logan Rotary Club of Utah responded to this need by acquiring, equipping and donating ambulances to Agua Prieta. The most recent of these was just earlier this year. Using an ambulance donated by the Smithfield, Utah fire department, the Rotary Club went to work. $2000 bought new tires and gasoline. With the remaining funds, the Rotary Club approached Globus Relief for the medical products to best equip the ambulance for its future mission. Luckily for them, their Globus contact, LaRae Thorpe, knew just what to do. As a long-time emergency medicine educator, LaRae expertly guided them to the best products to outfit the ambulance at the lowest cost.

The ambulance supplied, the Logan Rotary Club drove it to Douglas, where they delivered it into the hands of Manny, a Douglas, Arizona firefighter of Mexican origins. He transferred it to Agua Prieta, where it will be used to save lives for years to come. Globus Relief is proud to partner with the Logan Rotary Club and Douglas fire department to respond to the call to make life-saving equipment accessible to all.

FROM THE FIELD:
A LIFE-SAVING RESPONSE
Agua Prieta, Sonora, Mexico
Each year, volunteers provide a valuable and valued service at Globus Relief. Volunteers support our mission in countless ways, from sorting donated medical product in our warehouse to lending expertise on marketing, design, logistics and IT in our front office. Groups and individuals of all ages and backgrounds volunteer with us. We welcome corporate giving programs and social groups as well as schools, church groups and individuals. No matter the size of the group, every volunteer hour donated makes a difference in improving healthcare worldwide.

Globus Relief particularly thanks the students of Brigham Young University for their service in 2017.
HOW YOU CAN HELP

Product Donations
Product donations are the most effective way to make a difference to Globus Relief. Donations of a broad range of medical and health-related items can be put to efficient use. In addition, we encourage non-medical donations that can be used to fund humanitarian programs and operating costs. Our staff is happy to assist with arranging pick-up and transportation of any in-kind donations.

Cash Donations
We keep our costs lean and multiply every dollar into many times that value in humanitarian supplies. Donations can be made online via multiple payment options, over the phone, in person or by U.S. mail. We invite donors and interested parties to tour our warehouse and see our process in action any time.

Volunteer
Volunteers at our Salt Lake City facility improve the efficiency with which we can gather, process and redistribute supplies to charities. We have a variety of projects to accommodate different volunteer group sizes, ages, skill levels and interests.

Spread the Word
Your words are powerful. Whether in person or by social media, invite others to partner, donate or volunteer with us by spreading the word about Globus Relief’s mission and impact.
